UK Reverse Charge Calls

The cost of a UK Reverse Charge call is divided into two parts: a service charge and a charging rate. The cost of the call is dependent on the type of the line the call was made from.

These charges are also applied when a customer receives a call from somebody using the 0800 REVERSE service.

Operator Connected Calls

Customers may use an operator to connect calls to many destinations in the UK and abroad.

Customers should be aware that the costs of making calls through an operator are often higher than making the calls direct, so customers should try to make direct calls whenever possible. This is not the case for the Special Assistance Operator.

The different operators available to call are:

Operator Type	Number
UK	100
International	155
Special Assistance	198/195

There is no charge for making a call to an operator. Charges only apply if the operator then connects your call to a subsequent destination.

Charges for these calls generally have two parts: an Operator Service Charge for connecting the call which is a fixed amount for each call, and a Call Charge based on the type and duration of the call.

Operator Connected Calls to UK Numbers

Customers can easily make calls via an operator in the UK to the destinations in the following table. Customers cannot make Operator Calls to premium rate numbers. Customers who connect to directory enquiries via the 100 Operator will be charged as though they had made the call direct to the directory enquiry service.
